

Meeting agenda

Meeting 5 – Measure analysis

Date Wednesday, November 3, 2010

Time 16:40

Venue C00.14

Invited Roche Jean-François, Valentin Clément,
Jonathan Stoppani

- Agenda**
1. Review the measure results and discuss the analysis;
 2. Is it mandatory to specify a timeout in the search OD to avoid an “Out of resource error” if the maxjob parameter is limited?
 3. Discuss some unclear aspects of the POP-C++:
 - 3.1. How to remotely retrieve code (obj.map specification);
 - 3.2. What is the inoutfitness param to the JobMgr::Reserve method;
 - 3.3. Is the classuid in the request/response really needed once the object is initialized;
 - 3.4. What’s the meaning of the code part in the BindStatus call;
 - 3.5. How is the encoding negotiated? Is it the first one which is chosen?
